NOTE: Although this is a Quality controlled document, copies are readily available to all interested parties. No record is kept of copies issued but whenever a major update is carried out copies are sent to all Impala’s PGM customers. The current version is also available on the Implats website www.implats.co.za
SAFETY DATA SHEET

PRODUCT NAME: PALLADIUM POWDER

1. PRODUCT AND COMPANY IDENTIFICATION

Identification of the preparation:
Product name: Palladium powder  Product code: PD METAL
Chemical name: Palladium  Formula: Pd
Recommended uses: Manufacture of Palladium chemicals for use in catalysts, as
metal and/or in alloys for jewelry, dental alloys, electrical contacts

Company Identification:
Impala Platinum Limited – Refineries
Corner East Geduld Road & Cowles Street
P O Box 222, Springs  1560, South Africa
Tel.: +27 (0)11 360 3111,  Fax: +27 (0)11 360 3202
www.implats.co.za  *jamie.welman@implats.co.za
Emergency telephone no.: Impala Platinum Refineries +27 (0)11 360 3777
Poison Centre - Tygerberg Hospital, Belville, Cape +27 (0)21 931 6129

2. HAZARD IDENTIFICATION

Low toxicity

WARNING

Harmful - if swallowed, - in contact with skin, - if inhaled
The product may cause adverse health effects with high-level dust generation,
inhalation or prolonged skin contact.  May form palladium salts on contact with acids.

Additional Labeling:
Each container should be labeled as follows:
Before use read Safety Data Sheet
If dissolved, ensure adequate enclosure or ventilation; do not breathe mists and avoid
solution contact with eyes, skin and clothing – may cause sensitisation or allergic
reaction
If melted do not breathe furnace fume
3. COMPOSITION / INFORMATION ON INGREDIENTS

4. FIRST AID MEASURES

**Inhalation:** If over exposure occurs leave exposure area immediately. If other than minor symptoms are displayed seek immediate medical attention

**Ingestion:** If poisoning occurs, contact a Doctor or Poisons Information Centre on +27-21-931-6129. Do not induce vomiting. Give a glass of water to drink. Seek urgent medical attention.

**Skin:** Gently flush affected areas with soap and water. Seek medical attention if irritation develops.

**Eyes:** Flush gently with running water for at least 15 minutes. Seek medical attention if irritation develops.

5. FIRE-FIGHTING MEASURES

**Suitable extinguishing media:** does not burn

**Extinguishing media not be used:** not applicable

**Special exposure hazards:** none

**Special protective equipment for fire-fighters:** none

**NOTE:** Unlike some finely divided Palladium powder supplied by other companies, the material supplied by Impala Platinum is non-flammable and therefore DOES NOT present a fire hazard.

6. ACCIDENTAL RELEASE MEASURES

**Personal precautions:** If spilt (bulk) wear goggles and PVC or rubber gloves. Where a dust inhalation hazard exists (i.e. when used in large quantities) wear a Class P1 (particulate) respirator.

**Environmental precautions:** Prevent this material from entering into surface waters.

**Methods for cleaning-up:** SOLID – sweep up and place in sealed container. SOLUTION - Absorb with moist sand or similar and place in sealed containers for reprocessing or recovery.

7. HANDLING AND STORAGE

**Handling:** Avoid inhalation of dust or fumes. Avoid contact with skin or eyes. Use local ventilation which is adequate to limit exposure to levels not exceeding occupational exposure limits. Activities generating dust should be avoided.

**Storage:** Store in tightly sealed containers in a cool, dry and well-ventilated area removed from formic acid, sodium borohydride, active metals (e.g. Aluminium), hydrogen peroxide, ignition sources and foodstuffs. Ensure containers are adequately labeled, protected from physical damage and sealed when not in use. Check regularly for leaks or spills.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

**Occupational Exposure Limit:** (ACGIH, edition 2008)

**TLV-TWA:** 10mg/m³ (inhalable particles); 3mg/m³ (respirable particles) based on “particulates not otherwise classified”

**Respiratory protection:** Use an appropriate and approved respirator for toxic dust or fume if airborne concentration is likely to exceed the occupational exposure limits.

**Hand protection:** Wear suitable gloves (PVC or rubber)

**Eye protection:** Wear dust-proof goggles.

**Skin protection:** Safety shoes, overalls or similar full-body work clothes should be worn and laundered daily. This protective clothing should not be worn at home.

**Personal Hygiene:** Practice good housekeeping and personal hygiene procedures. No eating, drinking or smoking in work area. Wash hands thoroughly before eating, drinking or smoking. Avoid ingestion, inhalation and skin and eye contact. Medical examinations, monitoring, record keeping and hygiene facilities are recommended.
### 9. PHYSICAL AND CHEMICAL PROPERTIES

### 10. STABILITY AND REACTIVITY

The material is stable under normal circumstances.

**Conditions to avoid:** Exposure to high temperatures (>1000°C), generation of dust.

**Materials to avoid:** Contact with acids and strong oxidizing agents.

**Hazardous decomposition products:** Nil

### 11. TOXICOLOGICAL INFORMATION

#### 11.1 ACUTE TOXICITY

**Ingestion:** Palladium powder is non-toxic. May cause irritation of the gastro-intestinal tract. Palladium salts may be more toxic e.g. Palladium Chloride LD₅₀ 2704mg/kg Rat, oral (other salts LD₅₀ 5 – 170mg/kg Rat)

#### 11.2 SKIN CORROSION / IRRITATION

**Low-irritant:** Palladium metal is relatively inert. Prolonged and repeated exposure to dust/powder may result in irritation due to mechanical action. Possible sensitizer.

#### 11.3 SERIOUS EYE DAMAGE / IRRITATION

**Irritant:** Exposure may result in eye irritation, lachrymation, pain, redness, conjunctivitis and possible corneal burn with prolonged contact.

#### 11.4 RESPIRATORY OR SKIN SENSITISATION

**Non-irritant:** Palladium metal is unlikely to cause irritation except as a dust. Palladium salts are irritating to eyes, skin and mucous membranes and may cause sensitization.

#### 11.5 GERM CELL MUTAGENICITY

The effects of Palladium salts have not been fully investigated.

#### 11.6 CARCINOGENICITY

**Non-carcinogenic:** Palladium salts are listed as a non-carcinogenic in (all U.S.):

i) in the National Toxicity Program (NTP) Report on Carcinogens

ii) in the International Agency for Research on Cancer (IARC) monographs

iii) by the Occupational Safety and Health Administration (OSHA)

Palladium chloride has caused tumours in some animal studies.
11.7 REPRODUCTIVE TOXICITY
Animal experiments indicate that exposure to Palladium salts may result in production of abnormal foetuses. Pregnant women should avoid therefore contact with Palladium salts. However, the effects have not been fully investigated.

11.8 SPECIFIC TARGET ORGAN SYSTEMIC TOXICITY – Single exposure
Palladium salts have caused bone marrow, liver and kidney damage in experimental animals. They may also interfere with the use of energy in nerves and muscles and induce lung malfunctions. However, the effects have not been fully investigated.

11.9 SPECIFIC TARGET ORGAN SYSTEMIC TOXICITY – Repeated exposure
Palladium salts have caused bone marrow, liver and kidney damage in experimental animals. They may also interfere with the use of energy in nerves and muscles and induce lung malfunctions. However, the effects have not been fully investigated.

11.10 ASPIRATION HAZARD
Inhalation: Low irritant. Inhalation of dusts may result in upper respiratory tract irritation. Palladium metal poses a low hazard but palladium salts are potential irritants and sensitisers.

12. ECOLOGICAL INFORMATION
Due to the very low solubility of Palladium powder it does not directly pose any ecological threat. However, if converted to soluble Palladium salts it may have the following effects:

12.1 Accumulation:
- Persistence: hazard of palladium persistency in the environment
- Bioaccumulation potential: hazard of palladium accumulation
- Biomagnification: potential hazard of palladium magnification
- Biodegradability: no information available

12.2 Ecotoxicity:
- Aquatic organisms: Very toxic to aquatic organisms. May cause long term adverse effects in the aquatic environment.
  LC₅₀ Fish 24h; 7mg/l  EC₅₀ Algae 24h; 0.03mg/l
  EC₅₀ Algae 72h 0.02mg/l  LC₅₀ Worm 24h; 0.24mg/l
- Soil organisms: unknown
- Plants and terrestrial animals: unknown

12.3 Other adverse effects:
- Ozone depletion potential: does not contain ozone depleting substances
- Photochemical ozone creation potential: not applicable
- Global warming potential: not applicable
- Effects on waste water treatment plants: unknown

The environmental effects of Palladium and its compounds have not been fully evaluated.

13. DISPOSAL CONSIDERATIONS
Disposer must comply with state and local laws. This material can be metallurgically recycled by Impala Platinum, South Africa, which is a pre-authorized facility for the environmentally sound recovery of metals.

14. TRANSPORT INFORMATION
NOT REGULATED FOR TRANSPORT PURPOSES
Packing: in plastic bags sealed in tins which in turn are sealed in boxes
UN-Nr.: not applicable
IMDG-Code: not applicable
ICAO / IATA: not applicable
RID / ADR: not applicable
15. REGULATORY INFORMATION

| United States: CERCLA Sections 102a/103 (40 CFR 302.4): Not regulated |
| Canada: WHMIS Classification: D2B (toxic material) |
| EU/EC Classification: Xn (Harmful); not classified in Annex I of Directive 67/548/EEC (will change with implementation of GHS/REACH) |
