

ENERGY AND DECARBONISATION POLICY STATEMENT

Implats is a leading producer of platinum group metals (PGMs) committed to operating in an environmentally responsible way. Implats recognises that climate change is a global challenge requiring businesses to reduce greenhouse gas emissions across the value chain. Implats is dedicated to decarbonising its operating activities through a measured transition to a low-carbon future and to producing metals that support the global energy transition.

To this end Implats is committed to:

- Setting and reviewing carbon emissions reduction targets towards carbon neutrality by 2050
- Aiming for all new mine developments to source at least 30% of their energy requirements from renewable sources
- Including energy and greenhouse gas emission factors and metrics into the design, planning and operation of all projects, including growth projects at our managed and joint venture operations
- Progressively displacing fossil fuels with lower- or zero-carbon alternatives
- Investing in energy conservation and efficiency initiatives
- Including decarbonisation performance measures in executive remuneration structures
- Raising energy management awareness among employees, vendors, contractors and anyone entering Group operations
- Engaging in public policy advocacy and with regional structures to support low-carbon energy solutions for industry groups and local communities.
